invention alleged to be claimed in the subject application for prosecution on the merits to which the claims will be restricted if no generic claim is finally held to be allowable. In particular, the Examiner has indicated that the subject application contains a species of the claimed convection oven directed to the use of adjustable control surfaces and a species of the claimed convection oven directed to the use of reversible blowers. Currently, the application contains no generic claims.

In response to this requirement for restriction, Applicants hereby elect to prosecute Claims 9-16 of the subject application directed to the use of reversible blowers.

Applicants sincerely believe that this patent application is now in better condition for examination and, thus, respectfully request early allowance.

Respectfully submitted,
